

Bulletin 2021 111

October 29, 2020

As parents contact the school to discuss their choice for either eLearning from the School or eLearning from Home, please remember to keep the social distancing field updated – heading is SD found in roughly the middle of the A08 screen.

Enter a 5 if the student is coming back to school, enter 0 if the student is staying home. Any student with a blank indicates no choice was made and the default is that the student is staying home. As far as reporting, use BASIS to track the number of students returning. A new field was added to the Program Participation grid, it's called Learning Location. There are two values: School and Home.

Any questions, please contact the IT Service Desk at 754-321-0411 or via email
